SHEET METAL FABRICATION

SHEET METAL FABRICATION

Paligen Technologies delivers turn-key sheet metal parts custom manufacturing. Our extensive machinery supports industry-leading capabilities, from simple stampings to complex forming. Our sheet metal fabrication is located within a 525,000-square-foot facility in Garland, Texas, where we have delivered superior solutions to customers for more than 75 years.

PALIGEN™ TECHNOLOGIES

Sheet Metal Fabrication

CAPABILITIES

- Sheet metal parts stamping and custom manufacturing
- Dies, fixtures, templates, and CNC programs
- Progressive die forming
- Hydroforming
- Forming
- Deep draw forming
- Economic and rapid prototyping and production
- Fully equipped, state-of-the-art metallurgical laboratory and testing facilities

MARITIME CAPABILITIES

- Maritime Structures
- Maritime Equipment Assembly

AEROSPACE & DEFENSE COMPONENTS

- Aircraft Skins
- Wing Terminal Fittings
- Fuselage Stringers
- Structural Belt Frames
- Anti-Thrust Kick Back Components
- Custom Replacement Parts
- Reverse Engineering

CERTIFICATIONS

- AS9100D and ISO 9001:2015 Certified
- NADCAP Accreditations

QUALITY ASSURANCE

Our quality assurance department has full-dimensional inspection capabilities, state-of-the-art coordinate measuring machines, and laser-scanning equipment for mapping and comparison to customer models.

IN-HOUSE TESTING - METALLURGY

Our in-house testing facility offers mechanical testing, micro- and macrostructural examination including grain flow, hardness testing, electrical conductivity testing, fluorescent penetrant inspection, and chemical composition verification in accordance with the most recent industry and customer specifications.
