ROLL-IN ROLL-OUT

FEATURES

- Deployable roller system for standard ISO containers
- Direct interface with 463L pallets
- Roll-on transfer to MACTs and K-Loaders
- Non-permanent, no-modification installation
- Integrated pallet locking
- No lumber or dunnage required
- Manual install/removal in the field

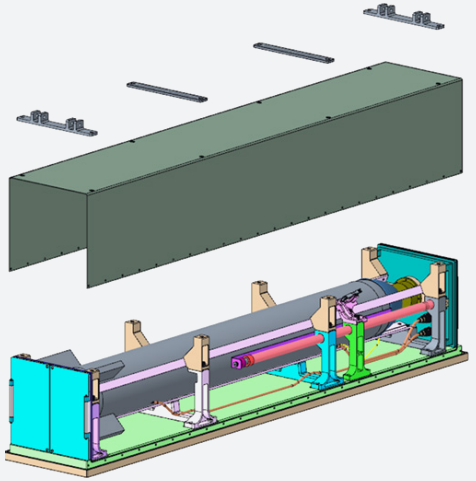

BENEFITS

- Rapid load/unload in minutes
- Eliminates blocking/bracing materials
- Reduces manpower and handling steps
- Cuts waste and clutter at the point of use
- Enhances intermodal throughput
- Lowers delivered logistics cost

COMMON LAUNCH CONTAINER

SYSTEM

- Fire Control and Munition interface adaptability
- Flexible Ejector Module tailorable to meet munition launch speed and force requirements
- Integrated shock and vibration isolation
- Scalable size to accommodate various munitions in 100lb, 200lb, 500lb, and 1000lb classes

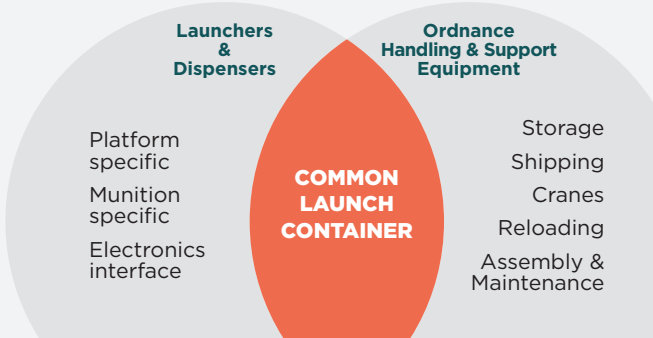

FEATURES

- Transport, store, and deploy munitions using a single container
- Stackable for efficient shipping and launch

BENEFITS

- Eliminates separate PHS&T materials
- Reduces handling time
- Reduces delivered cost
- Provides operational flexibility
- Stackable and efficient storage
