PALIGEN™ TECHNOLOGIES

Bringing Industry Back to U.S. Soil

We're revitalizing the industrial base by offering 100 percent American-made forged products servicing both the commercial and defense industries.

From Forging to Final Pack Solutions

Paligen Technologies offers bomb pressing, open- and closed-die forging, backward extrusion, thermal processing, nondestructive testing, surface coating, machining and final assembled/packaged products.

FORGED PRODUCTS AT GARLAND OPERATIONS

Paligen's Garland Operations has been home to some of the finest forging on U.S. soil for more than 75 years. As the years have progressed and America's needs have evolved, so too has Garland's capabilities. Through it all, the mission has remained the same — providing superior solutions to customers. Today, our forged products include:

- MK-80 Series Bomb Bodies
- Small Diameter Bombs (SDBs)
- Ordnance, Defense & Commercial Aerospace Forged Components
- Joint Air-to-Surface Standoff Missiles (JASSM)

AS9100D CERTIFIED | NADCAP ACCREDITATIONS

Precision Machining Capability

Our CNC machines produce micro-scale to large-format components, spanning the defense, aerospace, and industrial sectors.
